

Sarthak Kulshrestha

Senior DevSecOps Engineer | Security · DevOps · Cloud

Noida, Uttar Pradesh, India • sarthakkul044777@gmail.com • linkedin.com/in/sarthak-kul • github.com/Sarthak044

Summary

Senior DevSecOps Engineer with 4+ years architecting and securing high-availability infrastructure for mission-critical government projects. Specialised in hardening Kubernetes across hybrid landscapes — Google Cloud (GCP), Amazon EKS, and strict air-gapped on-premise clusters. Operationalises security at scale through automated vulnerability assessment, network-policy enforcement, and GitOps workflows. Proven record of cutting deployment times by 50% and sustaining 99.9% uptime across 30+ production servers.

Experience

Senior DevSecOps Engineer — CIPL (Corporate Infotech Pvt Ltd)

Sep 2025 – Present • Noida, India

- Architected and secured high-availability Kubernetes (HA control plane) on bare-metal / VM infrastructure in strict air-gapped environments.
- Designed end-to-end GitOps workflows with ArgoCD and Kustomize for automated, auditable, version-controlled production deployments.
- Enforced container hardening and CIS-benchmark compliance: non-root execution, read-only filesystems, minimised attack surface.
- Modernised cluster networking with the Kubernetes Gateway API, Traefik, and Kong Gateway OSS, replacing legacy routing with secure high-performance traffic control.
- Ran full-stack observability (Prometheus, Grafana, Loki, Tempo) and optimised persistent storage (NFS / CSI) for Kafka, Redis, and Doris.
- Secured the software supply chain with private internal registries (Nexus, JFrog), multi-stage Docker builds, and Trivy image scanning.
- Automated operational tasks in Go and Bash, focused on resource optimisation and cluster reliability.

DevSecOps Engineer — CIPL (Corporate Infotech Pvt Ltd)

Jul 2024 – Sep 2025 • Noida, India

- Stood up Kubernetes from scratch on on-prem servers using kubeadm, k3s, and MicroK8s (flannel / weave / Calico CNIs); RedHat OpenShift.
- Built Jenkins pipelines with Groovy scripts and multi-stage image builds; ran a local Docker registry with SSL alongside GitLab, JFrog, MinIO, and the ELK stack.
- Cut deployment time 50% by refactoring legacy pipelines into declarative Jenkinsfiles and Azure DevOps pipelines.
- Managed 30+ production servers at 99.9% uptime through automated patching and monitoring; tuned CPU / memory requests and limits for multi-node production clusters.
- Delivery for GovDrive (NIC), UPSC, and the Ministry of Labour & Employment, plus internal projects — applying security principles throughout the DevOps process.

Cloud Engineer — CyberYami (via DreamBig IT Solutions)

Dec 2022 – Nov 2023 • Noida, India

- Led deployment of the CyberYami EdTech platform, tuning server configurations for high concurrent user load.
- Delivered technical workshops on Reverse Engineering and Secure Coding (CDAC), mentoring 50+ students and junior developers.
- Handled Linux server administration and Bash scripting for automated backups and cron jobs.

Junior Cloud Engineer — Kassio

Apr 2022 – Nov 2022 • Noida, India

- Assisted migration of legacy monoliths to AWS (EC2, S3) with zero data loss; contributed to AWS Well-Architected Reviews.
- Maintained Kubernetes clusters with K9s and Helm; troubleshoot pod failures and resource limits.
- Ran Jenkins pipeline deployments and ELK log aggregation / alerting; Grafana database monitoring.

- Met GDPR and PCI-DSS compliance requirements.

Enterprise Tester / Assignment Evaluator — Virtually Testing Foundation

Apr 2021 – Jul 2021 • Remote

- Software testing and assignment evaluation within a remote security-focused program.

Technical Skills

Orchestration & Containers: Kubernetes (kubeadm, k3s, MicroK8s), Docker, Helm, ArgoCD, Kustomize, OpenShift, Traefik, Kong Gateway, Kubernetes Gateway API

CI/CD & GitOps: Jenkins (Groovy), Azure DevOps, GitLab CI, ArgoCD, Ansible, Terraform, multi-stage builds

Observability: Prometheus, Grafana, Loki, Tempo, OpenTelemetry, ELK Stack

Cloud: AWS (EKS, EC2, S3), GCP, Azure, air-gapped / on-prem private cloud

Security: DevSecOps / Shift-Left, CIS benchmarks, Trivy, SonarQube, Nexus, JFrog, RBAC, Network Policies, supply-chain security

Data & Storage: NFS / CSI persistent storage, Kafka, Redis, Doris, MinIO, MySQL

Languages: Go (Golang), Python, Bash / Shell

Certifications

Security: CEH (EC-Council) • eJPT (INE) • Cyberops Infosec Specialist (COISS) • Penetration Testing & Bug Bounty Hunting • (ISC)² Candidate • Computer Network Security • MTA: Security Fundamentals (Microsoft)

DevOps & Cloud: CKA – Certified Kubernetes Administrator (The Linux Foundation) • CKAD – Certified Kubernetes Application Developer (The Linux Foundation) • DevSecOps (EC-Council) • DevSecOps: Implementing Security in DevOps Processes • AWS Cloud Practitioner

Education

Indian Institute of Technology (IIT), Patna — M.Tech, Cloud Computing

Jul 2025 – Jul 2027 (expected) • Hybrid / Remote

JECRC University, Jaipur — B.Tech, Computer Science

2018 – 2022
